IMPROVEMENT ON PRODUCT	TITANO VII 250 t
ARTICLE	TI00101 / TI00110

Dear Partner,

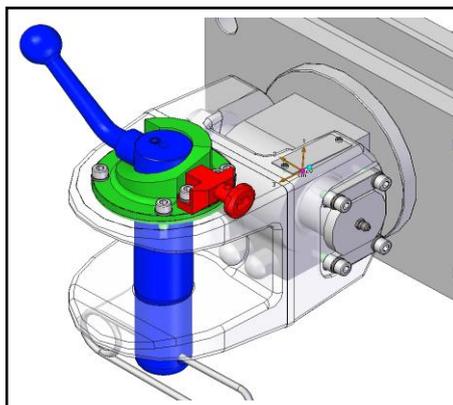

As part of our continuous improvement program, we have made the following changes:

OLD PART NUMBER	RG00519
NEW PART NUMBER	RG00576
INTERCHANGEABILITY PREVIOUS MODELS	YES
AVAILABILITY	December 2012

NEW VERSION

PREVIOUS VERSION

The new kit RG00576 includes:

1. **Rotating main pin with new open lever shape (BLUE COLOURED);**
2. **Upper bush with new shape (GREEN COLOURED);**
3. **Safety device (RED COLOURED);**

The kit is fully interchangeable with TITANO previous models.

Weight complete kit: 6,3 kg.

The new configuration of the main coupling pin and its cam allows TITANO to work in extreme weather conditions and load, allowing the pin to rotate 360° if the poor lubrication exponentially increases the friction between the coupling pin and the drawbar eye.

The improvement will become a standard on all new manufactured TITANO from begin 2013.

For eventual further information, please contact our Sales Department
